Partition 2 digit numbers

$10 + 5 = \square$

$10 + 2 = \square$

$10 + 7 = \square$

$10 + 1 = \square$

$10 + 4 = \square$

$\square + 1 = 11$

$\square + 6 = 16$

$10 + \square = 11$

$10 + \square = 17$

$10 + \square = 15$

$10 + \square = 18$

$10 + \square = 13$

$\square + \square = 17$

$10 + 6 = \square$

$10 + 9 = \square$

$10 + 3 = \square$

$10 + 8 = \square$

$10 + 0 = \square$

$\square + 4 = 14$

$\square + 8 = 18$

$10 + \square = 14$

$10 + \square = 19$

$10 + \square = 12$

$10 + \square = 16$

$\square + \square = 15$

$\square + \square = 13$

I can partition a 2 digit number into tens and units.
